OBJECTIVE

Developer with hands-on experience in backend systems, REST APIs, and cloud deployment. Skilled in Python, JavaScript, Go, and Rust across web, desktop, and computer vision projects.

SKILLS

Languages	Python, Java, C, JavaScript, Go, Rust
Web Development	HTML, CSS, React.js, Node.js, Next.js, PHP
Frameworks	Flask, Django, Express.js, Tauri, Wails, Flutter, Firebase
Databases	MongoDB, MySQL, Supabase
Developer Tools	Git, GitHub, Docker, Postman, REST APIs
Deployment	Netlify, Vercel, Render, DigitalOcean, Cloudflare, Heroku
Operating Systems	Linux, Windows

PROJECTS

DroidOps – Android Device Management GUI	<i>Tauri, React, Rust, TypeScript</i>	<i>Dec 2025</i>	[GitHub]
- Built a cross-platform desktop GUI for Android Debug Bridge (ADB) using Tauri and React. - Simplified Android device management with a user-friendly interface for file transfer, app management, and shell access. - Leveraged Rust backend via Tauri for native performance with a responsive Tailwind CSS frontend.			
GlyphDeck – Desktop Font Manager	<i>Go, TypeScript, Wails</i>	<i>Nov 2025</i>	[GitHub]
- Developed a premium desktop font manager for Windows using Go and Wails framework. - Implemented font browsing, preview, search, and organization features with a glassmorphism UI. - Built native desktop application combining Go backend performance with a TypeScript frontend.			
Certificate Generator and Verification System	<i>Node.js, Firebase, EJS, Tailwind</i>	<i>Dec 2024</i>	[GitHub]
- Developed automated bulk certificate generation from CSV uploads with dynamic field mapping. - Implemented QR-code and link-based verification enabling instant certificate validation through web access. - Built an interactive certificate editor using draggable canvas components for customizable layouts.			
IRRIGO – Smart Irrigation Platform	<i>Next.js, Flask, Python, REST APIs</i>	<i>Oct 2024</i>	
- Developed during NASA Space Apps Challenge to provide AI-driven irrigation recommendations for farmers. - Integrated real-time weather and environmental data to support decision-based irrigation scheduling. - Implemented a full-stack architecture with analytics dashboard for monitoring farm conditions.			
AI-Based Smart Traffic System Using Computer Vision	<i>Python, YOLO, Flask</i>	<i>Jan 2025</i>	
- Designed a traffic monitoring system using live camera input and computer vision models. - Implemented YOLO-based detection for vehicles and pedestrians for real-time scene analysis. - Developed adaptive traffic signal logic based on traffic density for optimized flow control.			

EDUCATION

B.Tech in Computer Science and Engineering	2022 – 2026
Mar Baselios Christian College of Engineering and Technology, Kuttikkanam APJ Abdul Kalam Technological University	

CERTIFICATIONS

Certificate	Issuer	Year
Programming with Python	Python Institute (OpenEDG)	2024
Python for Data Science	NPTEL – IIT Madras	2024
JavaScript Foundations Professional	Mozilla	Jul 2025
Amazon API Gateway for Serverless	AWS Training	Jun 2025
Ubuntu Linux Professional Certificate	Canonical	Nov 2025

ACHIEVEMENTS

Galactic Problem Solver	NASA Space Apps Challenge 2024
Global Connection Recognition	NASA Space Apps Challenge 2025
Global Nominee	NASA Space Apps Challenge 2025

ADDITIONAL INFORMATION

Areas of Interest	Backend Systems, API Development, Full Stack Development, Desktop Applications, Mobile Applications
Languages	English, Malayalam
